The above-mentioned organization was successfully evaluated and fulfils the criteria of the Qfor norm with modules ProcessScan and ClientScan. The Certification Commission of CertUp declares that this organization is certified according to the Qfor method with modules ProcessScan and ClientScan for the following services:

Learning: in-company training concerning the self-developed software package LISA ERP

Consulting: advice, implementation and project management concerning the self-developed software package LISA ERP

Certificate nr BE22122

Period of validity: 07/11/2022 - 07/11/2025

For the Certification Commission,

A handwritten signature in blue ink, appearing to read "De Vylder", enclosed in a blue oval.

Sophie De Vylder
Certification manager
13/01/2023

The Qfor method consists of a investigation about the characteristics of the organization. The module ProcessScan consists of a quality evaluation based on internal processes. The module ClientScan consists of a quality evaluation based on the perception of the customers. The module WSE-Scan consists of an evaluation of the minimal quality and registration requirements of WSE. This certificate is valid insofar as the management system permanently complies with the standard. The quality assurance systems concerning the application of the Qfor quality model is verified by the Survey Committee, which is supported by following associations that are represented in the Committee:
