The above-mentioned organization was successfully evaluated and fulfils the criteria of the Qfor norm with module ProcessScan. The Certification Commission of CertUp declares that this organization is certified according to the Qfor method with module ProcessScan for the following services:

Learning: in-company training related to the in house developed software package LISA ERP

Consulting: consultancy, implementation and project management related to the in house developed software package LISA ERP and consultancy and implementation regarding NIS2

Certificate nr BE25099

Period of validity: 07/11/2025 - 06/11/2028

For the Certification Commission,

Sophie De Vylder
Senior auditor
14/10/2025

The Qfor method consists of a investigation about the characteristics of the organization. The module ProcessScan consists of a quality evaluation based on internal processes. The module ClientScan consists of a quality evaluation based on the perception of the customers. The module WSE-Scan consists of an evaluation of the minimal quality and registration requirements of WSE. This certificate has a maximum validity of three years insofar as the management system permanently complies with the standard.

The quality assurance systems concerning the application of the Qfor quality model is verified by the Survey Committee, which is supported by following associations that are represented in the Committee:
